RUNNING PYTHON

(1)

Run sudo idle

```
blink13.py - /home/pi/blink13.py
                                                            _ | 0 | ×
File Edit Format Run Options Windows Help
# first import some helpful libraries
# This one lets us talk to the GPIO pins
import RPi.GPIO as GPIO
# This one lets us do cool stuff with time and timings
import time
# define a function to make the led blink
def blink (pin):
        GPIO.output (pin, GPIO.HIGH)
        time.sleep(1)
        GPIO.output (pin, GPIO.LOW)
        time.sleep(1)
        return
# Says we're using Raspberry Pi board pin numbers
GPIO.setmode (GPIO.BOARD)
# set up GPIO pin to be an output channel
GPIO.setup(13, GPIO.OUT)
# blink GPIO17 50 times
for i in range (0,50):
                         Type in this code
        blink(13)
GPIO.cleanup()
                         (you don't have to include the #comments in red)
```

Press F5 to run the code. You should save your work as whatever.py

Can you make the led blink at different speeds?
