## FIND THE COMMANDS TO PERFORM SOME TASKS:

1. What files are in the Documents directory?

2. What is the contents of the 'greet.txt' file?

3. Install all available upgrades

4. Install the 'cowsay' application?

5. Discover what 'cowsay' does and then use it.

6. Make a copy of 'empty.txt' and call it 'full.txt'

7. Now rename 'full.txt' to 'half-full.txt'

8. Start the Graphical User Interface

9. Give your Pi a new name using the 'hostname' command. There is a trick you need to know to make this work. Hint: how did you install new software?

WHAT DO THESE COMMANDS DO?
cowsay
fortune
rev

TRY SOME OF THE PYTHON GAMES
How do you play Ink Spill?

WHAT ARE ALL THE PRIME FACTORS OF THE NUMBER 204?

WHAT HAPPENS IF YOU TYPE THE NAME OF A COMMAND WRONG?

MAKE ME A SANDWICH.

SUDO MAKE ME A SANDWICH.

WHAT? MAKE IT YOURSELF.

OKAY.
